Cryptocurrency

What is Crypto Currency ?

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets.

Cryptocurrency received its name because it uses encryption to verify transactions. This means advanced coding is involved in storing and transmitting cryptocurrency data between wallets and to public ledgers. The aim of encryption is to provide security and safety.

The first cryptocurrency was Bitcoin, which was founded in 2009 and remains the best known today. Much of the interest in cryptocurrencies is to trade for profit, with speculators at times driving prices skyward.

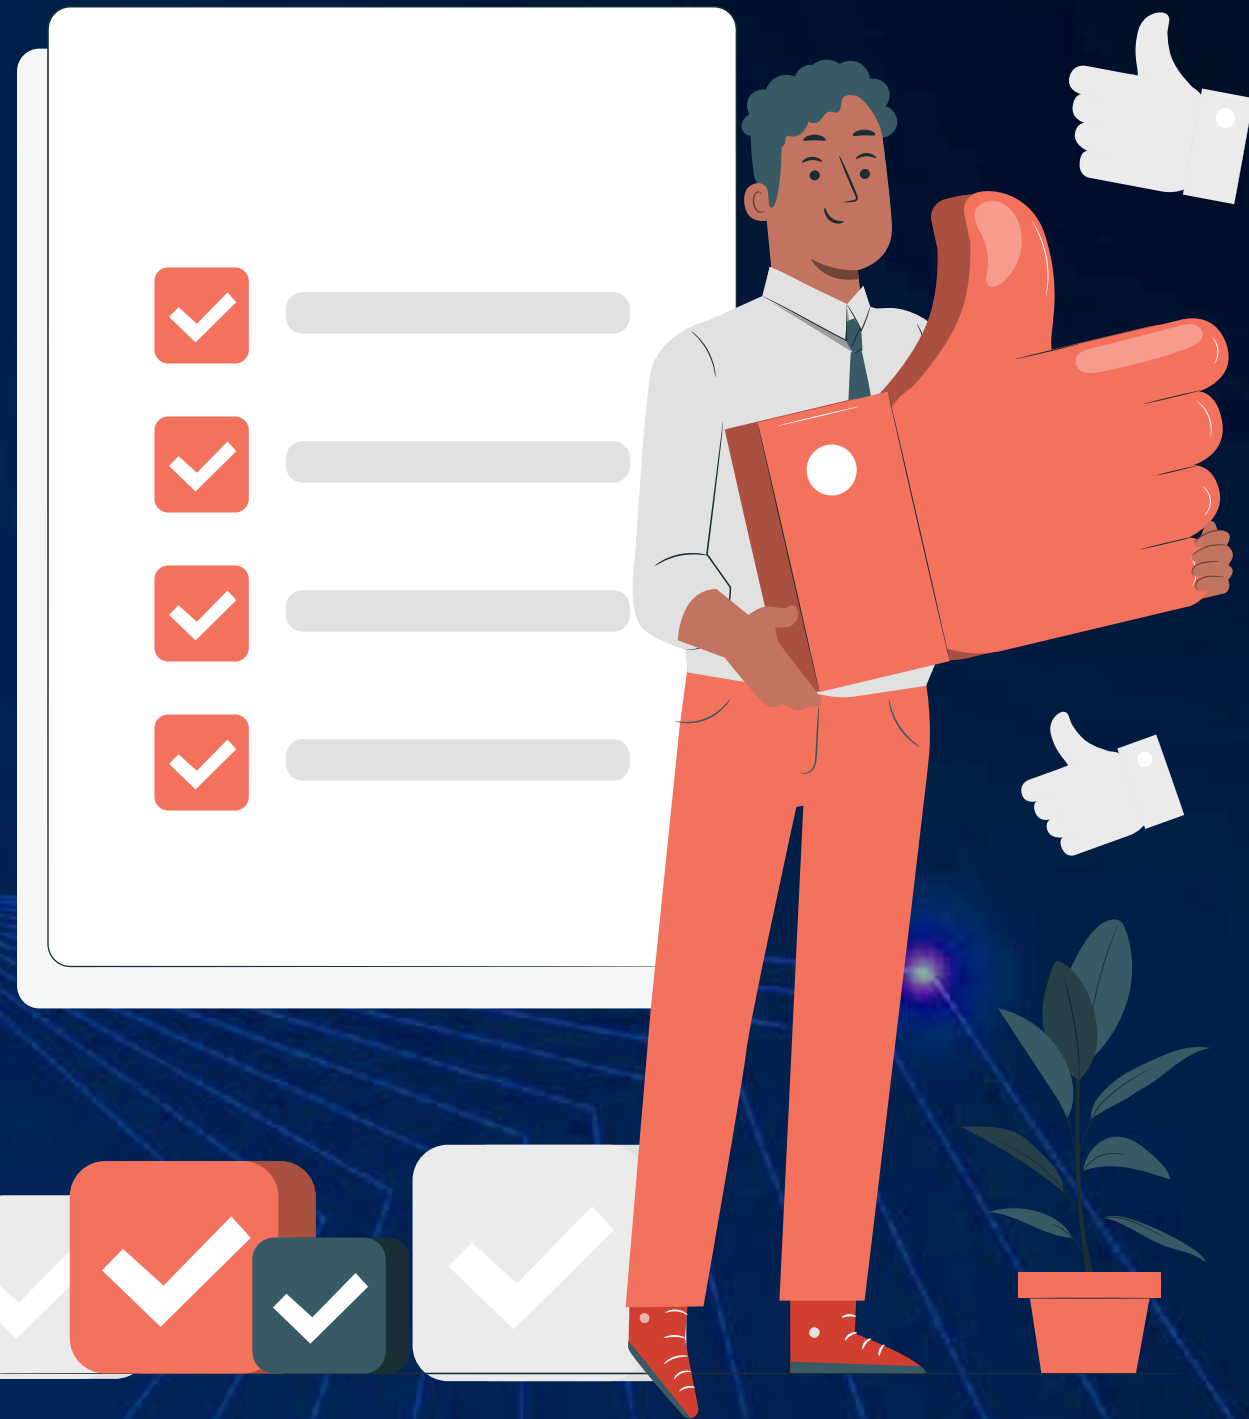

What is Blockchain

The blockchain is an online ledger that records transactions in real-time. From the cryptocurrency point of view, it allows people to send money directly to each other without going through banks or financial institutions. This makes it possible for individuals to create their own digital currency.

A blockchain is a decentralized database that stores data across multiple computers. Each computer has its own copy of the data, so no one computer can edit the data. Instead, every computer must agree with the changes made by another computer before those changes become permanent.

About BitPool

Bit Pool is an International platform specially designed for New Generation to achieve Financial Freedom in crypto Currency . It is one of the Pioneer platforms in the World. It is the best ever which provides very fast Financial Freedom without any type of Risk. Bit Pool is allow everyone to Become Partner and make Unlimited income.

Cryptocurrency is decentralized digital money that is based on blockchain technology and secured by cryptography. To understand cryptocurrency, one needs to first understand three terminologies – blockchain, decentralization, and cryptography.

Our Mission & Vision

We believe that crypto trading will open the future of the blockchain gaming platform and this will be the main stream in the future, especially in the decentralization of Bankroll and smart contract to prover and numbers. However, this will still be a long way to go. In the past few years, we have seen that many DAPP projects release there tokens. But when the player's Incentive disappeared, all players left immediately.

However, in July this year, we saw that Compound and Yearn successfully issued their own tokens and created a new type of token distribution method Farming. We understand that the current Tron and Ethereum ecosystem is gradually suitable for the development of DAO organizations. Where use tokens to vote and make decisions. The results of these decisions will be shared by the entire community.

If there is an online and of fine game, community's power can be used for marketing and promotion?

If the speed of BTC becomes faster in the future and the cost of betting on the chain becomes very low, smart contracts can also help you prove the fairness of randomnumbers? ICC Coin aims to democratize all operating procedures of forex trading platform, decentralized finance exchange, and blockchain gaming platform, so that anyone can participate with Perfex Coin token

Joining Package

BITPOOL

Types of Income

Get 5 Types Of Earning Opportunity

Autopool Income

Grow Pool Income
